BIOMETRIKA

BIOMETRIKA

FOUNDED BY
W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

VOLUME 59

1972

Editor
D. R. COX

Assistant Editor
A. M. Herzberg

Business Manager
D. V. Lindley

Editor of Auxiliary Publications
E. S. Pearson

Associate Editors
P. Armitage
M. S. Bartlett
F. Downton
M. J. R. Healy
J. F. C. Kingman
M. Stone
B. L. Welch

ISSUED BY
THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE LONDON

Printed in Great Britain at the University Printing House, Cambridge

Contents of Volume 59

PAGE

AFONJA, B. Minimal sufficient statistics for variance components for a general class of designs 295

ANDERSON, J. A. Separate sample logistic discrimination 19

ANDERSON, T. W. and STEPHENS, M. A. Tests for randomness of directions against equatorial and bimodal alternatives 613

ANDREWS, R. L., ARNOLD, J. C. and KRUTCHKOFF, R. G. Shrinkage of the posterior mean in the normal case 693

ANTLE, C. E. and RADEMAKER, F. An upper confidence limit on the maximum of m future observations from a Type 1 extreme value distribution 475

ARNOLD, J. C. (*See* ANDREWS, R. L.)

ATKINSON, A. C. A test of the linear logistic and Bradley–Terry models . . 37

ATKINSON, A. C. Planning experiments to detect inadequate regression models . 275

BASAWA, I. V. Estimation of the autocorrelation coefficient in simple Markov chains 85

BECKER, N. Vaccination programmes for rare infectious diseases 443

BENNETT, G. K. and MARTZ, H. F. A continuous empirical Bayes smoothing technique 361

BESAG, J. E. On the correlation structure of some two-dimensional stationary processes 43

BISSELL, A. F. A negative binomial model with varying element sizes . . . 435

BISSELL, A. F. Another negative binomial model with varying element sizes . 691

BLOOMFIELD, P. On the error of prediction of a time series 501

BOHRER, R. and FRANCIS, G. K. Sharp one-sided confidence bounds for linear regression over intervals 99

BOWMAN, K. O. Tables of the sample size requirement 234

BRANDIS, H. P. (*See* DAVID, H. A.)

BROOK, D. and EVANS, D. A. An approach to the probability distribution of cusum run length 539

BROOKS, R. J. A decision theory approach to optimal regression designs . . 563

BUKAČ, J. Fitting S_B curves using symmetrical percentile points 688

CARNAL, H. and RIEDWYL, H. On a one-sample distribution-free test statistic V 465

COLEMAN, R. Sampling procedures for the lengths of random straight lines . . 415

COLLINS, J. (*See* SCHAFER, R. E.)

COPAS, J. B. Empirical Bayes methods and the repeated use of a standard . . 349

CORNELL, J. A. A note on the equality of least squares estimates using second-order equiradial rotatable designs 686

COX, D. R. (*See* HERZERG, A. M.)

CRAMÉR, H. Studies in the History of Probability and Statistics. XXVIII. On the history of certain expansions used in mathematical statistics 205

CRUMP, K. S. and HOWE, R. B. Nonparametric estimation of the age of a Galton–Watson branching process 533

D'AGOSTINO, R. B. Small sample probability points for the D test of normality . 219

PAGE

DAHIYA, R. C. and GURLAND, J. Pearson chi-squared test of fit with random intervals 147
DANIELS, H. E. An exact relation in the theory of carrier-borne epidemics . . 211
DAVID, H. A., LACHENBRUCH, P. A. and BRANDIS, H. P. The power function of range and studentized range tests in normal samples 161
DAW, R. H. and PEARSON, E. S. Studies in the History of Probability and Statistics. XXX. Abraham De Moivre's 1733 derivation of the normal curve: A bibliographical note. 677
DAWID, A. P. and STONE, M. Expectation consistency of inverse probability distributions 486
DAWID, A. P. (*See* STONE, M.)
DECANI, J. S. A branch and bound algorithm for maximum likelihood paired comparison ranking 131
DENTON, G. M. On Downton's carrier-borne epidemic 455
DOLBY, G. R. and LIPTON, S. Maximum likelihood estimation of the general nonlinear functional relationship with replicated observations and correlated errors 121
DOMB, C. A note on the series expansion method for clustering problems . . 209
DOWNS, T. D. Orientation statistics 665
DRAPER, N. R. and TIERNEY, D. E. Regions of positive and unimodal series expansion of the Edgeworth and Gram–Charlier approximations 463
EFRON, B. and MORRIS, C. Empirical Bayes on vector observations: An extension of Stein's method 335
ERGLE, W. D. and KRUTCHKOFF, R. G. A nonparametric empirical Bayes estimator 483
EVANS, D. A. (*See* BROOK, D.)
FIENBERG, S. E. The multiple recapture census for closed populations and incomplete 2^k contingency tables 591
FINKELSTEIN, J. M. (*See* SCHAFER, R. E.)
FRANCIS, G. K. (*See* BOHRER, R.)
FREEMAN, H. and KUZMACK, A. M. Tables of multivariate t in six and more dimensions 217
FREEMAN, P. R. Sequential estimation of the size of a population 9
FRYER, J. G. and ROBERTSON, C. A. A comparison of some methods for estimating mixed normal distributions 639
GARDNER, M. J. On using an estimated regression line in a second sample . . 263
GART, J. J. Interaction tests for $2 \times s \times t$ contingency tables 309
GRUBBS, F. E. (*See* MANN, N. R.)
GUENTHER, W. C. On the number of replications of a paired comparison: An easy solution with standard tables 481
GURLAND, J. (*See* DAHIYA, R. C.)
HANDA, B. R. Choice of initial states in estimating transition probabilities of a finite ergodic Markov chain 407
HARTLEY, H. O. and PFAFFENBERGER, R. C. Quadratic forms in order statistics used as goodness-of-fit criteria 605
HERZBERG, A. M. and COX, D. R. Some optimal designs for interpolation and extrapolation 551
